

Technical Management

Technical management is at the heart of what we do. Our experience in managing the proposal, suppliers, installation and handover stages for all technical system related work on both new builds and refits ensures you receive your systems on time, on budget and on specification.

Our technical management services include:

- **The production of system proposals**
- **Assessment of system proposals**
- **Onboard surveys for upgrades and pre yacht purchase**
- **Ongoing project management**
- **Subcontractor management**
- **Commissioning**

From technical advice to project management, Crest Systems works with shipyards, yachts and owners' teams to manage the design, the subcontractors, the technology and the application. Working with the industry's leading shipyards and electrical contractors as well as the various AV integrators worldwide and having been involved in some of the industry's flagship projects, Crest Systems are well placed to provide independent advice and management leaving you with peace of mind and the advantages of our knowledge, skills and experience.
